

Egelabra 35th Annual On-property Ram Sale Wednesday 17 October 2018

Open for inspection: 9:30am - Sale commences: 1:00pm

Welcome

Our 35th Annual On-Property Ram Sale will be held on the plots of, Egelabra's Ram Depot, "Eenaweena" Warren on Wednesday the 17th of October 2018.

We welcome all visitors, returning clients, interested Merino breeders and new clients. We aim for our day not only to showcase our bloodline but to be an opportunity for different industry participants to interact and share ideas. This year we especially encourage all to come and enjoy a 'cuppa' and some lunch on the ram plots at "Eenaweena" and have a few hours break from this unrelenting drought.

We look forward to presenting to you the 2017 July /August drop sale rams. It has been a challenging year, with the young rams a few kg back on body weight from last year and the overall micron slightly finer; not uncommon in a dryer year, especially for genuine grass-fed rams that have not been pampered.

Offering 10 specially selected March shorn rams and 150 April shorn grass-fed rams averaging 88kg (no grain). The draft averages: 19.4 for micron, 34mm eye muscle area with 3.5mm of fat.

The rams have been visually scrutinised first before any figures are assessed. They have then been indexed both for Merino production and Merino dual purpose through Ram Power, allowing you to see our top performers based on these indexes. The drop bares the Egelabra pure bright, white wool and is above average for fleece weight.

It is an exciting time to be in Merinos with lamb, sheep and wool prices so strong. We have some challenges ahead until nature delivers but Egelabra ewes have a robust ability to adapt to these tougher times, requiring minimum inputs, as long as we manage her well during her critical demand periods.

I am confident we can return to maximum production quickly by focusing on the ewe as the 'hub' for future production. If there is a need for your operation to restock we have one of the largest client bases and networks within one bloodline and are only too happy to help you regain your footing to full production as soon as possible.

Rams will be penned on the day at 9.30am for inspection. If required, please contact Cam Munro to organise inspection prior to sale.

Thank you to all our clients and I hope the much-needed rainfall is delivered soon.

Cam Munro

Egelabra 35th Annual On-property Ram Sale Wednesday 17 October 2018

Open for inspection: 9:30am - Sale commences: 1:00pm

JULY/AUGUST 2017 DROP SIRE DESCRIPTION

| | | |
|------------|-----------------|--|
| 01.0036 | x 99.4000 | A big long bodied sire with excellent handling, 119kg body weight. Reused in our AI program after 10 years. Mic: 18.3 SD: 3.7 CV: 20.2 CF: 99.3 |
| 04.1498 | x 0.0036 | Big long bodied plain sire with a magnificent fleece. Reused in our AI Program after 10 years. Mic: 18.9 SD: 3.5 CV: 18.5 CF: 99.8 |
| 11.0770 | x EE1 | Big plain bodied sire that has produced the most tops in the past five years. GFW: 8.0kg Mic: 19.7 SD: 2.8 CV: 13.7 CF: 99.8 EMD: 36 Fat: 4 |
| 11.1375 | x EEM | A plain bodied sire, cutting 7.2kg in eight months with a below average micron. GFW: 7.2kg Mic: 18.4 SD: 2.6 CV: 18.5 CF: 99.1 EMD: 35 Fat: 3 |
| 12.0140 | x 9.0348 | Heavy cutting medium wool sire. GFW: 8.5kg Mic: 19.1 SD: 3.3 CV: 16.2 CF: 99.5 EMD: 30 Fat: 2 |
| 13.0435 | x 9.0988 | An HEK Sire noted for his wool cut. GFW: 7.3kg Mic: 20.3 SD: 3.5 CV: 17.7 CF: 99.0 EMD: 37 Fat: 2.5 |
| 13.0458 | x 9.0988 | Deep crimping sire. GFW: 7.8kg Mic: 20.5 SD: 3.2 CV: 15.5 CF: 99.0 EMD: 35 Fat: 2 |
| 14.0880 | x BIG | Good free grower. Our best performing sire with 14 of this year progeny selected in reserves and sale. GFW: 8.7kg Mic: 19.5 SD: 3.8 CV: 16.1 CF: 99.9 EMD: 34 Fat: 2.5 |
| 14.1280 | x EEM | Big plain sire with terrific figures. Has bred nine in the top 10% in his first year. GFW: 9kg Mic: 20.1 SD: 3.8 CV: 19.4 CF: 99.5 EMD: 39 Fat: 4.5 |
| 14.2029 | x WHITE SYN | Good head, heavy cutter, free grower, very good wool. GFW: 10kg Mic: 19.9 SD: 3.7 CV: 18.5 CF: 98.9 EMD: 35 Fat: 2 |
| 15.3907 | x EG | Heavy cutting medium wool sire with a good spring of rib. GFW: 8.1kg Mic: 21.2 SD: 4.0 CV: 19.2 CF: 97.7 EMD: 38 Fat: 4 |
| BIG | (Blue Button) | Best free growing general stud ewes, above average cut. Joined to a special sire syndicate. |
| EEM | (Red Button) | Top maiden special stud ewes by special sire syndicate. |
| YELLOW SYN | (Yellow Button) | Mixed age special stud ewes by maiden special sire syndicate. |
| EE4 | | Mixed age special stud ewes by mixed age special sire syndicate. |
| EG | | General sire. |

Egelabra 35th Annual On-property Ram Sale Wednesday 17 October 2018

Open for inspection: 9:30am - Sale commences: 1:00pm

**The following conditions shall apply to all rams sold by
H E Kater & Son Pastoral Co Pty Ltd (Egelabra).**

RETENTION OF HALF SEMEN SALE PROCEEDS

- 1) In the event that the buyer elects to market semen from the ram purchased, the buyer shall account and pay to the seller one half of the net proceeds there from.**
- 2) The buyer shall not market semen from the ram purchased, other than on terms consistent with industry practices, without the consent of the seller.**
- 3) The buyer shall not sell or assign any interest in the ram purchased without first ensuring that the purchaser entered into a Deed of Covenant with the seller binding the purchaser to the seller in the manner stated in conditions 1 and 2.**

Measurement clarification

| | |
|---------------------------------------|--|
| Fibre Diameter (Micron) | Fibre diameter will be presented as the actual micron on each individual ram. Tests were taken from the mid-side on 6 August 2018. |
| Standard Deviation (SD) | A measure (in microns) either side of the mean fibre diameter in which 68% of fibres lie. |
| Co-efficient of Variation (CV) | Measures the spread of fibre diameter variation relative to the average. It is calculated by dividing the standard deviation (SD) by the mean fibre diameter then multiplying by 100. |
| Comfort Factor (CF) | The percentage of fibres less than 30 microns in a sample, ie: 100% Comfort Factor = 0% of fibres greater than 30 microns. |
| Greasy Fleece Weight (GFW%) | The yearling fleece weight measured as a percentage. |
| Eye Muscle Depth (EMD) | The depth of the eye muscle, measured at the C site (45mm from centre of the spine). |
| Fat Depth | The measurement of fat depth at the C Depth. A deeper measurement indicates a fatter carcass. |
| Weight | Body Weight recorded 24 September 2018. |
| Ram Power Indexes | <p>The Ram Power Indexes displayed rank the male progeny of the 2017 drop at Egelabra for the two indexes described below. These are within flock rankings based on measured trait performance including, Yearling and Hogget Body Weight, Fleece Weight, Fibre Diameter, FD CV and FD SD. Visual assessment and individual trait performance must be considered in conjunction with the index.</p> <p>A value of 100 is the median or middle of the drop. A value of 120 is 20% better, while 80 is 20% below the median.</p> |
| Ram Power Merino MP+ Index | This index is suited to a self-replacing Merino production system. Surplus progeny are sold as hoggets after shearing. Expected responses to MP selection are moderate increases in body weight and fleece weight and reduction of fibre diameter. |
| Ram Power Merino DP+ Index | This index suites a meat focused or dual-purpose operation. Surplus progeny are sold as lambs and a portion of ewes are joined to terminal sires. Expected responses to DP selection are large increases in body weight, while maintaining fibre diameter. |
